

ANANYA AYYASWAMI

New York, NY | (669) 261-9812 | ananyaayyaswami@gmail.com | [linkedin.com/in/ananya-ayyaswami](https://www.linkedin.com/in/ananya-ayyaswami)

EDUCATION

Columbia University — New York, NY

Aug 2026 – Dec 2027

MS in Applied Analytics

University of California, Davis — Davis, CA

Sept 2020 – June 2024

BS in Biotechnology, Emphasis in Bioinformatics | Relevant Coursework: Computational Bioinformatics, Applied Statistics + R, Python & Data Structures

SKILLS

Programming & Data: Python, R, SQL, Excel, PyQt

Analytics & Machine Learning: Data Cleaning, Data Visualization, AutoML, Predictive Modeling

Bioinformatics: Biopython, NCBI, BLAST, FastQC

Collaboration: Cross-Functional Communication, Research, Problem-Solving, Project Coordination

PROFESSIONAL EXPERIENCE

Software Consultant — RAAD Systems

Apr 2025 – Sep 2025

- Collaborated with cross-functional teams to prototype Python and CLI tools for a biotech client focused on gene sequencing and genomic technologies.
- Developed PyQt GUIs for real-time communication with laboratory hardware supporting gene expression analysis and related applications.
- Integrated hardware and software systems to automate data workflows and visualize biological data for research applications.

Research Associate — Biogenex Laboratories

Jul 2024 – Feb 2025

- Used IHC, ISH, and FISH techniques to test cancer markers, applying rigorous quality standards to support reliable biomarker analysis.
- Organized and processed laboratory data in Excel, improving workflow consistency and accessibility for research teams.
- Integrated Omicsveu automated testing technologies and collaborated cross-functionally to support laboratory workflows.

Bioinformatics Research Assistant — UC Davis Weimer Lab

Apr 2023 – Jun 2024

- Analyzed genomic datasets with Biopython and NCBI to identify disease-associated mutations and developed Python scripts to automate bioinformatics workflows.
- Cleaned, sorted, and visualized large-scale biological datasets using Python and R to support research analysis and interpretation.
- Applied FastQC and BLAST for comparative genomic analysis and sequencing-data quality assessment.

Data Analysis Intern — Ford

Jun 2023 – Aug 2023

- Cleaned and analyzed operational data using Python and Excel to identify and correct errors in automation workflows.
- Developed machine learning models to predict potential outcomes from company data, applying analytical methods to business problems.
- Supported change-management initiatives using Excel while managing multiple priorities and communicating progress.

LEADERSHIP

Vice President — Girls Who Code, UC Davis

Aug 2022 – Jun 2024

- Helped establish the UC Davis chapter and organized technical workshops and the university's first hackathon for marginalized communities.
- Partnered with companies like Intel and Medtronic to coordinate networking events connecting students with industry professionals.
